

Introduction for Students

How can I start my own Business?

A Unit of Work for Secondary Students

Welcome to this online unit on money which will let you look at the different ways that people can get money, why people work, how money comes into your community and how you can get money by starting your own business!

Sam and Tash, two teenage students, will lead you through this Unit step by step and show you how to start up your own small business.

You and your teacher will have to decide whether you want to work as a class and set up one business or whether you want to work in groups or by yourself to set up one of many different businesses.

You and your teacher will also have to decide how to access the student worksheets. Your teacher may decide to print these for the class or you may be required to download each activity only as you work through the different sections. Just click on the arrow next to each activity to download it separately.

There are some interactive activities where again you need to click on the arrow next to it. You can print these off and use them for either small group or class discussions.

Good luck and I hope you will be very successful in your small business!
